

Enhance industrial efficiency with our advanced chillers

About System

Discover the pinnacle of industrial cooling precision with our Air & Water chiller systems. Crafted to exacting standards, these advanced units blend state-of-the-art thermodynamics with rugged durability. Engineered for efficiency, they balance optimal energy use with steadfast cooling power, guaranteeing reliable performance across dynamic manufacturing environments. Whether it's ensuring equipment longevity or meeting stringent production demands, our chiller solutions stand as indispensable assets, driving seamless operations and setting new benchmarks in industrial cooling excellence.

Specification

- Capacity: up to 50 TR and Above
- Customization (optional)
- Air & Water chillers
- Safety interlocks
- Alarm for errors & problems
- Temperature controller
- In-built water pump
- High efficient PHE
- Modular setup
- User friendly
- Plug & Play system
